Subject: Completion Of CMRPC C-13 Prioritization Project

During 2012, the Planning Board represented Charlton in the Central Mass. Regional Planning Commission's C-13 Prioritization Project. The goal of the project was to create a regional mapping and database in two (2) categories of local parcel categorization: parcels prioritized for economic development and parcels prioritized for natural preservation.

This database and mapping compilation project was completed in November of 2012 with the CMRPC releasing this past week the project report and maps (see attached January 17, 2012 project release letter). Should you wish to read the report and review the parcel data and mapping information for Charlton or the other 12 project communities, please feel free to access the report as posted on the CMRPC webpage at http://www.cmrpc.org/Central_PP. Please note that there is an "underscore" symbol in the link's webpage address between "Central" and "PP."

This link will also be posted in the Planning Board section of the Town webpage in the near future for your access convenience. We hope that you find this information informative and useful as it pertains to Charlton's economic development planning and land use planning efforts.
