

# INVASIVE SPECIES WORKSHOP

- Ever wonder about that woody vine that wraps itself around your gutters and you can't get rid of it?
- Did you notice that you have been able to see more of the shore line at Buffumville Lake? Why there are so many weeds in the lake?

Discover the answers to your invasive species questions at the informational workshop!

May 13<sup>th</sup> from 1-3pm at Buffumville Lake Park

Topics that will be covered include: aquatic weed identification, terrestrial weed identification, destructive insect identification, prevention and eradication methods, water chestnut control at West Thompson Lake, and storm water runoff effects on invasive weeds.
